COMMUNICATIONS DIRECTIVE)
NO. 6A)

17 August 1944

ALTERNATE INSTALLATION OF RANGE RECEIVERS
IN AAF L-TYPE AIRCRAFT

1. Reference is made to Communications Directive No. 6, subject: Installation of Satchell Carlson Model 591 Radio Receivers in AAF L-Type Aircraft, this Headquarters, dated 12 May 1944. It is realized that the installation delineated therein may not be feasible in many instances due to differences in the location of certain components among the AAF aircraft. Therefore, the installation shown in the attached diagram is hereby authorized and may be adopted at the discretion of the Wing Commander.

2. One advantage in locating the receiver in this manner is that it will not be necessary to disturb any other equipment. Moreover, this method will allow the set and its power source to be distributed more evenly over the center of gravity.

3. Additional material such as cable and clamps will be needed in order to complete the above installation. In the event it is not possible for the Wing Commander to obtain the necessary materials from his nearest AAF supply activity, a requisition may be submitted to the National Communications Officer. The deadline for those requisitions will be September 15th. Such requisitions which are received after the foregoing date will NOT be honored and will be returned to the originator without action.

By direction of Colonel JOHNSON, National Commander:

FRANK I. ADAMS,
Capt., Air Corps,
Communications Officer.
